

Risk Consultant/Boiler Inspector

Company: Sovereign General

Department: Risk Engineering

Employment Type: Regular Full-Time

Work Model: Remote

Language: This role operates in English

Additional Information: This/these role(s) is/are currently vacant.

The Opportunity:

As a wholly owned subsidiary of the Cooperators General Insurance company, Sovereign Insurance believes your experience matters. This is our promise to not only our clients but to our employees as well, because we know the strength of our company starts with our people. The smart, curious, and collaborative people who bring their whole heart and passion to work each day. But you can't pour from an empty cup; we take care of the well-being of our people so that they are inspired to protect Canadian businesses and the lives, families, and communities we impact. Join us and begin shaping your experience at Sovereign.

Become a key member of our growing and dynamic team of Boiler Inspectors by lending your exceptional organization skills and keen eye for detail to support our practice nationwide.

How you will create impact:

- As a qualified boiler inspector, conducting periodic inspections of boilers and pressure vessels for our clients and helping them meet the requirements of the Provincial Regulations.
- Managing workflow, including timely requests and communication with clients, brokers and jurisdictions on findings identified during inspections.

- Contributing to our knowledge base and acting as a resource on aspects related to jurisdictional inspections

How you will succeed:

- You thrive on delivering our exceptional client experience through positive and engaging relationships, embracing accountability to achieve effective results.
- You ensure your day to day actions are in harmony with the company's purpose, vision, and values even when challenged.
- You will support and guide others through changing conditions and encourage the exploration of new opportunities or innovations.
- You value cooperative and collaborative dialogue because diverse perspectives offer more creative and productive solutions.

To join our team:

Education – Completion of one of the following areas of study

- - Diploma, bachelor's degree or higher in Engineering, Applied Science or Technology from an accredited institution
 - Power Engineering certification program (2nd Class or higher)
 - Boilermaker, steamfitter or pipefitter
 - Military or merchant marine training program – marine or stationary boilers, pressure vessels or nuclear reactors (2nd Class or higher)
 - American Petroleum Institute API-510 or API-570 Inspector certification
 - Completed a course of study in an accredited technical school that included subjects on Manufacturing, Building Construction, Construction Technology, HVAC and Industrial Technology

Experience – 3 to 5 years minimum in the pressure equipment industry undertaking

- Engineering or design review
- Manufacturing, fabrication methods or process, in either shop or field
- Operation of a high-pressure boiler steam plant > 50,000 lbs./hr. (total capacity)
- Repairs, alterations or maintenance of boilers and/or pressure vessels
- Inspection of boilers and/or pressure vessels (in-service or during construction)

- Intermediate degree of computer literacy (Microsoft Office Suite preferred), including ability to quickly learn new/proprietary software.
- Must possess and maintain a valid driver's licence.
- National Board In-service commission (IS) and Ontario Certificate of Competency (COC) is an asset.
- Knowledge of Risk Engineering in insurance such as loss exposures, hazards and controls is an asset.
- Certified Insurance Professional (CIP) or Canadian Risk Management (CRM) Designations are an asset.

What you need to know:

- The successful candidate will undergo training to acquire their National Board "In-service Commission" and Ontario Certificate of Competency (COC)
- High degree of independence working from a home office
- Travel may at times be extensive, with overnight stays required
- Site visits include industrial/manufacturing facilities and work in confined space

What's in it for you?

- The opportunity to take on challenging work and contribute your expertise, creativity, and passion in meaningful ways.
- A comprehensive total rewards package, including competitive salary, bonus, paid time off, pension and benefits.
- A holistic approach to your well-being, with physical and mental health programs and flexible work options.
- The opportunity to work on an inclusive team who inspire each other to explore and achieve what's possible.
- An organizational commitment to sustainability and charitable giving; positively impacting the social, environmental and economic well-being of Canadian businesses, families and communities.
